

Lawrence Berkeley National Lab Capital Projects Update

Presentation to Community Advisory Group

July 15, 2013

LBNL Shuttle Bus – Passenger Count

LBNL Shuttle Bus Ridership - Passenger Count

LBNL Shuttle Bus – Bicycle Count

LBNL Shuttle Bus Ridership - Bicycle Count

Architectural Features:

- Articulated building facades, not smooth surfaces
- Architectural treatments to break up fenestration such as mullions and sunshades
- Minimal glazing on some facades
- Interior shades
- Low reflectivity glass

Lighting

- Shielded exterior lights with minimal spillage
- No up lighting
- Lighting controls to turn off interior lights at night

No feature related hazards

- No skywalks, greenhouses, glazed balconies or freestanding glass
- No roof top antennas or guy wires
- No wind generators

Current Activities

Wilson Slide from Above

Wilson Slide from Above

- There are no significant changes or delays in the project or milestone dates.
- The access road to the slide work area from the Lawrence Hall of Science is complete.
- Layout for the retaining walls is almost completed.
- The installation of a chute on the side of hill to move dirt from the top of the slide to McMillan Road for removal is under design and review and should begin next week.
- There has been very slight movement of the slide. The contractor will monitor any movement during the course of their work.

Truck Trips

Thank You
